IN THE CLAIMS:

Please cancel claims 1-20 without prejudice, and add new claims 21-32.

- 21. (New) A bubble generating assembly comprising:
- a housing having a front opening;
- a bubble generating ring positioned adjacent the front opening;
- an air generator associated with the housing that directs air towards the bubble generating ring; and

an air control system that has a cover element which is adjusted to cover selected portions of the air generator.

- 22. (New) The assembly of claim 21, wherein the air generator is a fan that is aligned with the bubble generating ring.
- 23. (New) The assembly of claim 21, wherein the air generator is housed inside the housing.
 - 24. (New) The assembly of claim 21, further including:
 - a motor retained inside the housing and coupled to the air generator; and
 - a trigger coupled to the coupled for activating the air generator.
 - 25. (New) The assembly of claim 21, further including:
 - a source of bubble solution; and
 - a tubing that couples the source of bubble solution and the bubble generating ring.
 - 26. (New) The assembly of claim 25, further including:
 - a pump system coupled to the tubing; and
- a trigger coupled to the pump system to control the delivery of bubble solution to the bubble generating ring.

- 27. (New) A bubble generating assembly comprising:
- a housing having a front opening;
- a bubble generating ring positioned adjacent the front opening;
- an air generator associated with the housing that directs air towards the bubble generating ring; and

means for controlling the amount of air that is directed by the air generator towards the bubble generating ring.

- 28. (New) The assembly of claim 27, wherein the air generator is a fan that is aligned with the bubble generating ring.
- 29. (New) The assembly of claim 27, wherein the air generator is housed inside the housing.
 - 30. (New) The assembly of claim 27, further including:
 - a motor retained inside the housing and coupled to the air generator; and
 - a trigger coupled to the coupled for activating the air generator.
 - 31. (New) The assembly of claim 27, further including:
 - a source of bubble solution; and
 - a tubing that couples the source of bubble solution and the bubble generating ring.
 - 32. (New) The assembly of claim 31, further including:
 - a pump system coupled to the tubing; and
- a trigger coupled to the pump system to control the delivery of bubble solution to the bubble generating ring.
